1 Check that the metal canister is firmly attached to the plastic inhaler. Remove cap.

2 Shake inhaler 3-4 times.

3 Push the inhaler all the way into the spacer. Take off the spacer cap if it has one.

4 Breathe **OUT** all the way.

5 Close your lips around the spacer. Press down once on the inhaler; this puts medication into the spacer.

6 Breathe **IN** slow and deep.

7 Hold your breath for 10 seconds, and then breathe out slowly.

8 If you need another puff of medicine, wait 1 minute and then repeat steps 4-7.

9 Rinse your mouth with water and spit out.

Spacers should NEVER be shared and should be cleaned often. To clean a spacer:

- 1) Remove the inhaler from the spacer. Do not wash the inhaler.
- 2) Wash the spacer with warm, soapy water and rinse.
- 3) Air dry the spacer.
